

02  
50. (Twice Amended) A composition according to Claim 31, wherein the weight ratio active material of anionic surfactant/active material of amphoteric surface is between 1 and 20.

51. (Twice Amended) A composition according to Claim 31, wherein the weight ratio active material of anionic surfactant/propenetrating agent is between 0.1 and 10.

**REMARKS**

Reconsideration is requested.

Claims 31-33 and 35-61 are pending.

The claims have been amended above to, at a minimum, place the application in better condition for Appeal by obviating the Section 112, second paragraph, rejection of claims 33, 50 and 51 noted in paragraphs (i) and (iii) of pages 2 and 3 of the Office Action dated May 14, 2002 (Paper No. 10).

Specifically, one of ordinary skill in the art will appreciate that the ratio of claim 50 is a weight ratio as the proportions of anionic surfactant are expressed in weight percent (see, page 6, lines 7-11) as are the proportions of amphoteric surfactant (see, page 7, lines 27-30). Similar support may be found in the amendments to claim 51 and the Examiner is requested to see page 6, lines 7-11 and page 8, lines 3-6 of the specification in this regard. Entry of the above and withdrawal of the Section 112, second paragraph, rejection of claims 50 and 51 are requested.
